Education

University of Wisconsin-Madison - Madison, WI   May 2021
- Retailing & Consumer Behavior - Bachelor of Science

University of Minnesota-Twin Cities - Minneapolis, MN   August 2023
- Full Stack Bootcamp - Portfolio: AntonneauWebDev.com

Skills

HTML | CSS | JavaScript | React | Node.js | Express.js | MongoDB | MySQL | MVC Framework
Restful APIs | GraphQL | OAuth | Bootstrap | Git | Heroku | NPM | Agile Development | Adobe Creative Suite

Development Experience

Job Board Application
- Led a full-stack development team in constructing a Job Board Application with Agile development methodologies
- Utilized Node.js and Express.js to handle back-end operations, Handlebars.js for templating, and MySQL with Sequelize ORM for database management, demonstrating a strong understanding of full-stack development.
- Integrated the application with Heroku and JawsDB for seamless deployment and database management, showcasing my abilities in DevOps.

React Portfolio
- Developed a responsive personal portfolio website using React, react-router-dom, Material UI, and React Hooks, exhibiting expertise in modern web development practices.
- Created a dynamic projects section where each project is represented by a ProjectItem component, showcasing the ability to work with dynamic data and rendering components based on that data.
- Used hooks such as useState and useEffect in components like Navbar.js to control component states and lifecycle events, showcasing a deep understanding of the React Hooks system.

Social Media API
- Single-handedly developed a server-side Social Network application using Express.js server, MongoDB database via Mongoose, and Moment.js for date handling, highlighting advanced backend development skills.
- Built an Express.js server to handle API routing, demonstrating proficiency in server-side JavaScript development.
- Enabled comprehensive CRUD operations on users, thoughts, and reactions, testing API endpoints with tools like Insomnia Core and Postman for flawless functionality.
- Leveraged Mongoose to interact with a MongoDB database for managing users, thoughts, and reactions, illustrating my strong abilities in database management and operations.

Employment History

Kohl's - *Assistant Designer for Denim (SO and Sonoma)*   March 2022-Present
- Conducted exhaustive market and competitor research, using analysis tools like Edited and WGSN, to drive trend-based design decisions.
- Mastered Adobe Illustrator for product ideation and sketching, working closely with the Technical Design team to ensure design integrity.
- Negotiated strategically with vendors to meet lean price targets and effectively managed last-minute fabric and trim changes to avoid significant supply commitments.
- Effectively utilized PLM software for BOM setup, bid line management, and maintaining product shells.
- Participated in fit sessions and several rounds of counter-sample reviews to achieve design vision and quality standards.

Bennett Antonneau

AntonneauWebDev.com - 414-731-5209 - benantonn@gmail.com - www.linkedin.com/in/benantonn/

- Worked extensively with the merchant and global denim teams, developing new washes and merchandising wash ranges and trims for the product line.
- Presented comprehensive market overviews and design proposals to leadership, influencing the new direction of the brand.
